What is the Question– Level 1

- Is prevalence of acute and chronic respiratory diseases increased in garbage collectors compared to municipal gardeners in Hanoi?
- Is passive smoking the major risk factor for lung cancer in Southern Vietnamese Women and are these below the risk factors for lung cancer in Southern Vietnamese Women?
- What factors influence the outcome of MDR TB treatment in programmatic management of multi-drug resistance tuberculosis (PMDT)?
- Is the prevalence of latent TB infection of ENT HCWs higher than HCWs in GP department in public hospitals in Hanoi 2012?
- Is the CAT score correlated with health status measured by SGRO score in Vietnamese COPD patients ?
